

History

Neff-Pressen tailor-made solutions in the forming technology

Walter NEFF GmbH was founded 1947 in Bad Urach (Württemberg/Germany) by Mr. Eng. Walter Neff. In spring 1988 the new owner moved the company to Karlsruhe.

Due to this the company got the possibility to develop further and within the following years NEFF changed from a handicraft enterprise to a worldwide operating middle sized company.

Today the company **is a leading manufacturer of hydraulic presses and manufacturing lines** for the complete forming industry. The origin of the continuous success is founded in our company philosophy and our know-how of the branch. In spite of our continuous success we were able to remain a mid-sized company and due to this being able to react fast and spontaneous to customer requirements.

1947

Founded by Mr. Walter Neff in Bad Urach.

1988

Taken over by Mr. Dieter Dörmann and company transfer to Karlsruhe.

2003

Delivery of the first Hotstamping Line.
