

Sheet metal forming system

NEFF has for each application in the sheet metal forming the optimal type of hydraulic press in their range of product. One-sided –double-sided presses as well as 2- and 4- column presses.

Depending on the requirements it is possible to insert these presses in the stand-alone drive or automatic as a complete production line. Please don't hesitate [to contact us](#). We are pleased to create an optimal solution with you

For sheet metal forming processes the NEFF- type series EP and EZP, DP and DZP as well as 2SP and 4SP come into consideration

NEFF Double sided press DZP 400 with drawing cushion and tape feed

NEFF Double-sided press DZP 630 with drawing cushion and robotic automation
