

Retrofit Upgrading

The alternative to new investment

The upgrading of your hydraulic press is a **possible alternative** to new investment. Equipped with the latest control and safety engineering your presses will be operational for many years.

In general we execute overhauling, retrofits and upgrades concerning drive-, control- and automation engineering on NEFF presses as well as on machines from other manufacturers.

Advantages of retrofitting/press upgrading

- Upgrading
- Reliability of the production process
- Safety control
- Productivity gain through latest drive concepts
- New control components for minimization the set-up times
- High-precision increasing (renewal of guides store, lubrication etc.)
- Consideration of the latest safety aspects (recent safety control)

Curious? We are looking forward to hearing from you!
